Definition of Links in Communication Protocols
by Marco Di Pietro, Tommaso Di Girolamo, Paolo Fiumi, Paolo Traverso, Marco Zamboni, and Paolo Zuccherato

Abstract
In this paper, we propose a formal framework for the definition of links in communication protocols. The framework is based on the concept of a link, which is a sequence of messages exchanged between two processes. The framework is designed to be used in the context of protocol verification.

1. Introduction
In this paper, we propose a formal framework for the definition of links in communication protocols. The framework is based on the concept of a link, which is a sequence of messages exchanged between two processes. The framework is designed to be used in the context of protocol verification.

2. Preliminaries
A communication protocol is considered as the set of messages exchanged between two processes. The messages are represented as a sequence of actions. The actions are represented as a sequence of labels and values.

Definition 1.1 (Process). A process is a sequence of actions.

The set of all possible messages between two processes is denoted by M .
